

Software Club

Vision:

We at software club will always be working towards adding new skills and upgrading knowledge on the already learnt skill and software for the students.

Our vision is to make every student learn the skills that are relevant to their field of study and their interests. With the upcoming advancement in the technology, and the competition for skilled professionals increasing rapidly, it is necessary that the students have knowledge of what is actually required for them to stay in the league.

We always welcome suggestions from the students and the faculty and work towards making the students compete with their peers.

Events Conducted:

1. **Programming Quiz:** A quiz comprising of basic programming questions.

Winners:

1. Shivam Dubey
2. Anuj Chourasiya
